

# Process Flow Control Solutions

## ProcessMaster - The first choice for industrial flow measurement

ProcessMaster's Modular design offers the industry's widest range of liners, electrodes and sizes to meet the needs of even the most demanding applications. Whether an integral, remote or pipe mounted installation is required, a configurable common electronics platform provides the best tailor-made solution.

	<p align="center"><b>Largest Range Available in the Market</b>                  Sizes from 1/10 to 80 in</p>
	<p align="center"><b>Superior Control with Advanced Sensor Design</b>                  Standard 25Hz excitation frequency reduces process without additional cost of traditional high-signal DEC meters</p>
<p align="center">0.4 % 0.2 %</p>	<p align="center"><b>Best Performing Magmeter Available</b>                  Now there's a choice, +/-0.4% standard, +/-0.2% optional</p>
	<p align="center"><b>Improved Reliability</b>                  Self-cleaning and double sealing electrodes improve reliability</p>
	<p align="center"><b>Intuitive Navigation and Configuration</b>                  Easy set-up guides the operator step by step through the menu to set parameters quickly</p>
	<p align="center"><b>Powerful and Flexible Transmitter</b>                  Same cartridge module for both integral and remote mount designs and any hazardous area application</p>
	<p align="center"><b>Sensor Memory Simplifies Installations</b>                  Sensor memory eliminates configuration errors and assure a fast and safe start-up</p>
