Sanitary Pump Repair Services

FCX performs

Testing & Repair Services

FCX Performance can disassemble, resurface, inspect, and replace seals and reassemble your damaged pump to factory specifications. Our wet test stand also allows us to document that the pump meets your performance criteria.

- Inspection
- Warranty Repair
- Mechanical Services
- Electro-polishing Services
- Performance Test Stand
- Authorized Alfa Laval Service Center

Pump Solutions

FCX can engineer, assemble, test & repair sanitary rotary lobe and centrifugal pumps. Our capabilities range from providing base shaft pumps to complete skid mounted pump assemblies with variable frequency drives.

We carry an extensive inventory of rotary lobe and centrifugal pumps in the surface finishes required by the life sciences market.

About FCX

FCX is a leading provider of process, flow control accessories for a variety of corrosion resistant and high purity applications. Our application expertise and product range differentiates us from our competitors.

Beside pumps, our high purity product range includes valves, instruments, hose, tube, fittings, steam products, heat exchangers and a broad range of value-added services.

Inventory

FCX Performance maintains a large inventory of LKH series centrifugal and SRU and SX rotary lobe pumps from Alfa Laval.

These pumps are designed to meet the needs of the pharmaceutical industry and are complete with electro-polished surfaces, material test reports, Class VI Elastomers, and performance test reports.

The FCX Advantage

We understand that production downtime negatively impacts the bottom line of your operations.

We recognize the need for quick turnaround on pumps and pump repairs. In response, we have stocked the largest amount of sanitary rotary lobe and centrifugal pumps on the east coast of the United States.

When a pump problem arises within your operations make FCX Performance your first call for fast and dependable pump related products, services, and solutions.
