FCX Performance

FCX is a leading provider of flow control solutions, services & products. With 13 offices covering 26 states, \$150 million in annual sales and 185 employees, we can meet your needs. We combine market leading products and years of cryogenic & industrial gas application expertise to provide the right solution for your process requirements.

Jamesbury Wafer-Sphere Cryogenic Butterfly Valve 3"-30" ANSI, Class 150-600

- Series K815, K830, K860
- Compact body design-rapid cooling
- In service down to -320°F
- All welded construction-no external leaks
- High-strength extension
- Custom length extensions available
- Ease of maintenance; simply insert and replace seat
- Eccentric disc and offset shaft

KOSO Hammel Dahl Series V817 Cyogenic Globe Valve 1"-6" (DN 25 - 150) ANSI Class 150 - 600

The Series V-817 control valve is designed specifically for use in cold box applications. It is a single-seated body-guided globe style with threaded seat ring. The extended neck allows the body to bonnet flange to be outside the cold box, simplifying maintenance and providing a low cool down weight. This design is generally used in throttling and/or isolation control of cryogenic liquids and gases to -450°F.

PBM CP Series 5 Cryogenic Ball Valve 1/2" - 2", ANSI Class 150

PBM CP Series 5 ball valves have a unique design that provides superior performance through cooling and heating cycles

- Temperatures from -320°F
- Live loaded upstream seat, seals and bonnet
- Stainless and other materials
- Cleaned for oxygen service
- Locking lever handle or oval locking handwheel
- Automation available
- Upstream vent hole in valve-unidirectional valve

ABB Instruments

- Flowmeters
- Positioners
- Pressure & Level Transmitters
- Temperature Transmitters
- Wireless Field Instruments

Flow Control Products & Services

- Asco 2, 3 & 4 way solenoid valves & switches
- Crosby safety relief valves
- Check-All check valves
- Ashcroft gauges
- Magnetrol level instruments
- Safety & flow control valve repair
- Systems integration
