

Providing Flow Solutions to the Hygienic Industries for “everything on the process”

Pharmaceutical & Biotech - High purity life sciences processing equipment, operations support, metrology and field calibration, on-site validation, MIV (Main Instrument Vendor) services

Personal Care - Providing critical quality control thru support and expertise around demanding and varied processing needs

Cell & Gene Therapy - Meeting the rapidly growing demand for single use processing solutions

Beverage - Maximizing process line uptime thru Efficient process solutions for the unique & growing beverage market

Dairy - Efficient Process and production system needs delivered thru quality brands and services that meet or exceed 3A standards

Confectionary - Maintaining accurate flow and temperature control demands to ensure the quality of finished products

Brewing, Sprints & Wine - Innovative products and systems that maximize efficiencies, cleaning, quick change-overs and batch production

Poultry & Beef - Maintaining your sanitary processes and improving uptime while meeting regulatory standards

Packaged Foods - Delivering systems that increase shelf stable demands

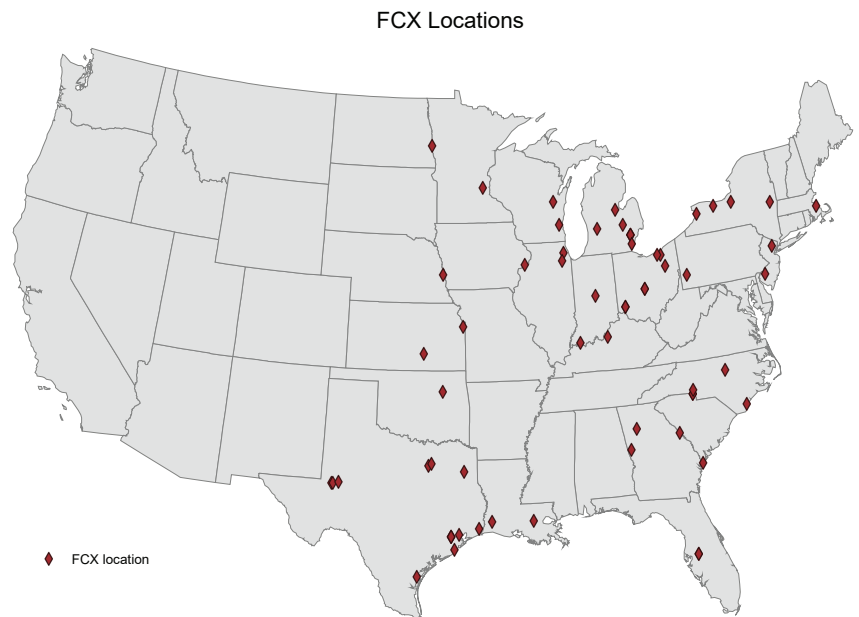

EPC - Collaborative approach meeting demanding specifications and project requirements

OEM - Ensuring pre-engineered and designed systems operate at peak performance

eXpertise, eXcellence, eXperience: The FC^X Factor

One Source for Everything on the Process

- Coverage: 65+ locations throughout the U.S. increases responsiveness to local customer needs
- Team Members: Over 1000 team members, including 250+ highly experienced technical sales professionals backed by over 250+ service and repair technicians
- Products: Widest range of Specialty Flow Control Products, creates unique one-stop-shopping for technical engineered products
- Services: Broad product offering supported by Life-Cycle Services maximizes the performance, uptime and return on mission critical assets
- Inventory: Extensive inventory of engineered solutions speeds delivery

FOR ALL OTHER | 800.253.6223

FCXPERFORMANCE.COM

Your Process Flow
Control Experts:
**One Source for
Everything on the Process**

If you need help improving processes, solving complex problems, or
Performance is a leading process flow control company, providing

Engineered Flow Control Products

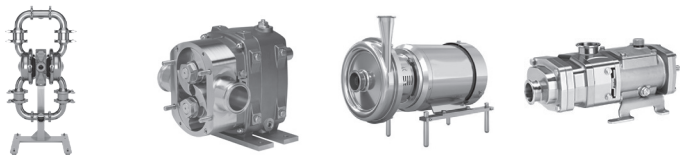

Our team has expert knowledge of the products we supply and can recommend solutions to meet your specific challenges. Let us help you source, stock, manage, and deliver anything from a single product to a fully integrated process flow control solution — with next-day shipping on most in-stock items.

We supply everything on the process! With more than 45,000 products in stock (and growing), we can get you what you need, when you need it, and where you need it.

Valves & Automation – manual, automated on/off, control, mixproof and special service

Pumps & Rotating Equipment – process pumps & industrial pumps, and mechanical seals

Instrumentation – pressure, temperature, level, flow, record & control, and analytical measurement

Filtration – process filter housings, elements, strainers and automated systems

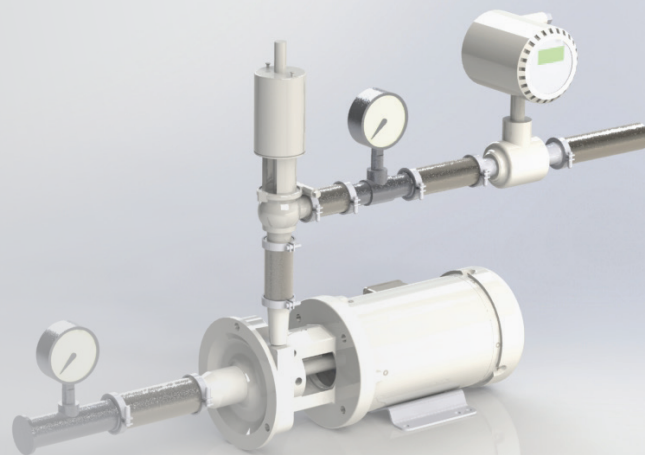

Steam & Process Heating – steam and condensate, heat exchangers, water heaters, and humidification

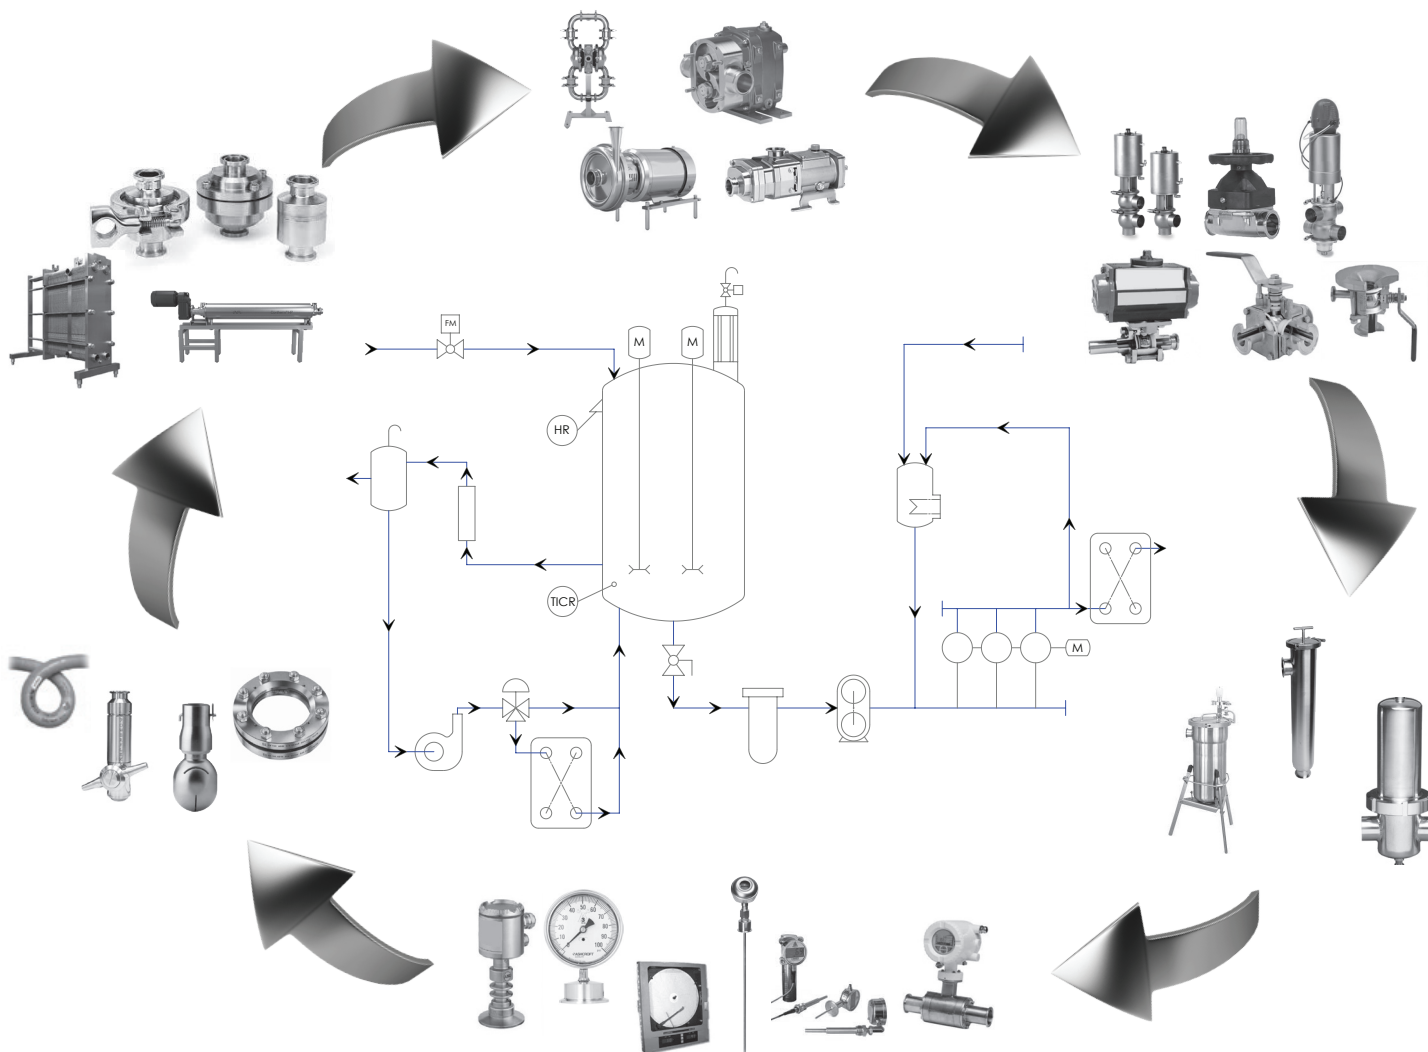

Specialty Components Pipe & Hose – Custom hoses, sight glasses, tank cleaning, product recovery

or increasing efficiency, you can rely on FCX Performance to provide solutions for technical, mission-critical products and services to end users, OEMs, and E

One Source for Everything on the Process

ions to fulfill your process flow control needs. FCX
EPC firms across a broad range of industries and markets.

Services

Capitalize on the benefits of service continuity from a single provider so you focus on your core business. Our value added services, including sophisticated consultation services, system audits, and a full suite of maintenance and repair services, can help you improve cost control, reduce plant downtime, and increase efficiency while maintaining critical regulatory compliance. Calibrations are performed by highly technical, cGMP/GLPtrained personnel who are knowledgeable in quality guidelines enforced by the FDA, EPA and ISO/IEC 17025:2017. Instrumentation is always handled appropriately, and processes will not be compromised.

- **Instrument Calibration**

- » 150+ field service techs
- » ISO/IEC 17025:2017 Accredited
- » Process Calibration
- » Metrology
- » Pipette Services
- » Laboratory Instrument Calibration

- **Valve and Actuator Repair**

- » Multiple assembly and repair centers of excellence
- » Factory certified technicians and facilities
- » In-line, Automated and Safety Relief valve setting, testing and repair

- **Pump and Seal Repair**

- » 8 State of the Art Facilities
- » Factory trained and authorized technicians

- **Specialty Pipe Fabrication**

- **Hose Fabrication**

- **Field Service**

- » Valve
- » Pump
- » Mobile Machine and Repair Shops
- » Instrumentation Service and Calibration
- » Steam Trap Surveys
- » Energy Audits
- » Boiler
- » Predictive Maintenance
 - Lubrication & Fluid Analysis
 - Thermography
 - Vibration Analysis
 - Motor Circuit Analysis

- **Commissioning & Consulting Services**

- » Technical Project Management
- » Validation
- » Technology Transfer
- » Kneat Implementation
- » Engineering Data Strategy
- » Quality Maintenance & Calibration Program Audits
- » Storeroom MRO
- » CMMS Implementation
- » Asset Management
- » Thermal Mapping
- » Blue Mountain RAM
